

SIKANEWS

SIKA CARES – OUR COMMITMENT TO SUSTAINABILITY

With Sika's sustainability strategy "More Value – Less Impact", which was realigned in 2019, the company pursues the objective of creating lasting value for people and the environment, while at the same time adopting a moderate and sustainable approach to the utilization of resources. With focus on six sustainability areas, Sika wants to shape the future in a responsible way.

A sustainable roofing solution from Sika was installed in the elephant enclosure in Zurich Zoo.

SUSTAINABLE SOLUTIONS

Sika has a portfolio of technologies and products that combines functional performance with optimized sustainability. The company's services for its customers are therefore shaped by innovation, reliability, and future viability.

CLIMATE PERFORMANCE

Among other things, CO₂ is a consequence of fossil energy consumption, which can only be reduced by increasing energy efficiency. Sika is therefore working to achieve a climate-friendly future not only through its products and solutions, but also on its own production sites.

COMMUNITY ENGAGEMENT

With its program "Sika Cares", the company is helping local communities to build up and maintain infrastructure for social projects. Important elements also encompass the advancement of education and vocational training, as well as projects that focus on water and climate protection.

ENERGY

Sika is determined to reduce energy consumption as well as greenhouse gas emissions. This inevitably entails energy efficiency and the replacement of fossil fuels with renewable energies. The use of innovative and resource-preserving technologies has an additional sustainable impact.

WASTE/WATER

A key pillar of sustainable development is the sparing and efficient use of materials and water. Here the company scrutinizes the entire value chain, from the use of raw materials and the manufacture of its products through to the disposal of waste.

OCCUPATIONAL SAFETY

The safety and health of employees must be guaranteed at every site. Targeted programs raise awareness of this issue, making safe, healthy, and attractive working conditions mandatory at Sika's locations all over the world.

"The Sika growth strategy ensures long-term success. The company's innovative drive combined with sustainability is a key component. "More Value – Less Impact" refers to Sika's obligation to maximize the value of its solutions and contributions for all stakeholder groups, while simultaneously minimizing the risks and resource consumption associated with value generation."

Paul Schuler, CEO Sika AG

SUSTAINABLE SOLUTIONS

We are leading the industry by pioneering a comprehensive portfolio of customer-focused solutions, combining both higher performance and improved sustainability.

TARGET

- All new product developments with "Sustainable Solutions" until 2023

CLIMATE PERFORMANCE

We run our business in a responsible way and mitigate climate change and its impacts.
