THE APURVA KEMPINSKI, BALI, INDONESIA

PARQUET FLOOR BONDING: SikaBond® T-55 J, Sika® Primer MB

BUILDING TRUST

PARQUET FLOOR SOLUTIONS

PROJECT DESCRIPTION

The Apurva Kempinski Bali establishes its distinctiveness as a tribute to the richness of Indonesian cultural heritage. The Apurva translates as “unique and magnificent” in Sanskrit, embracing Kempinski’s dedication to bringing unique experiences to life.

Internationally recognised for expressing a distinctive design attitude, the award-winning architect, Budiman Hendropurnomo of Denton Corker Marshall drew his aesthetic inspiration from the Balinese tradition, way of living and art of balance. Balinese believe that harmony in life is a combination of Panca Maha Butha or Five Elements consist of Akasa (Ether), Bayu (Air), Teja (Fire), Apah (Water), and Pertiwi (Earth).

Accommodation is a collection of 475 luxurious guest rooms, specialty suites and exclusive villas. Each accommodation provides spacious living with an array of exclusive amenities and bespoke service; either overlooks the magnificent Indian Ocean or the tranquil nature. True to the nation’s tropical characteristics, 176 suites and 43 villas come with their own private pool, whilst 48 Grand Deluxe Rooms have direct access to a lagoon pool. Accommodations are designed to provide luxury and comfort, inspired by Indonesia’s tropical characteristic blended with modern influences.
