

Roofing

Dependability of the Market Leader

Innovation

Added Value on the Roof

Building owners, architects, engineers and contractors profit from many decades of experience in developing and producing high-quality system solutions based on polymeric waterproofing, and from tailored solutions that can be rapidly realized thanks to our worldwide local presence – whether a new roof or roof renovation.

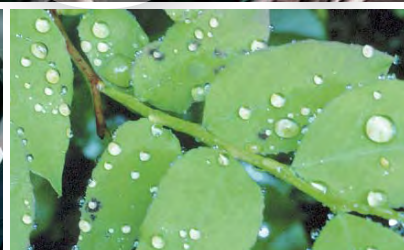

Sika Roofing customers benefit from our proven innovation capabilities and from the professional know-how of our staff. Sikaplan and Sarnafil systems, products, and

services are designed to precisely suit local needs worldwide. What this means to our customers is simple: added value on the roof.

Sarnafil®

Diverse Solutions and creative Design with Sarnafil®

For decades, architects, engineers, building owners and contractors have valued the great design freedom and the variety of solutions available.

System solutions with Sarnafil not only meet high requirements for appearance and design flexibility worldwide; they fit the trends of modern roof construction and ecological solutions in harmony with nature.

All these advantages are supplemented by a comprehensive range of services that can be utilized individually depending on the specific needs of the customer and project.

Service in every Phase

- Specification writing
- CAD drawings
- Jobsite visits
- Roof analyses (for renovation)
- Optimized wind load calculations
- Life-cycle cost analyses
- Warranty coverage
- Individual consultation
- Contractor training
- Roof Graphics: turning the roof into advertising space
- Recycling of roofing membranes wherever possible

Sarnafil®

Standard Solutions with Sikaplan®

Sikaplan® is ideal for roofing contractors and general contractors seeking a cost-effective, dependable, and easy-to-install roofing system.

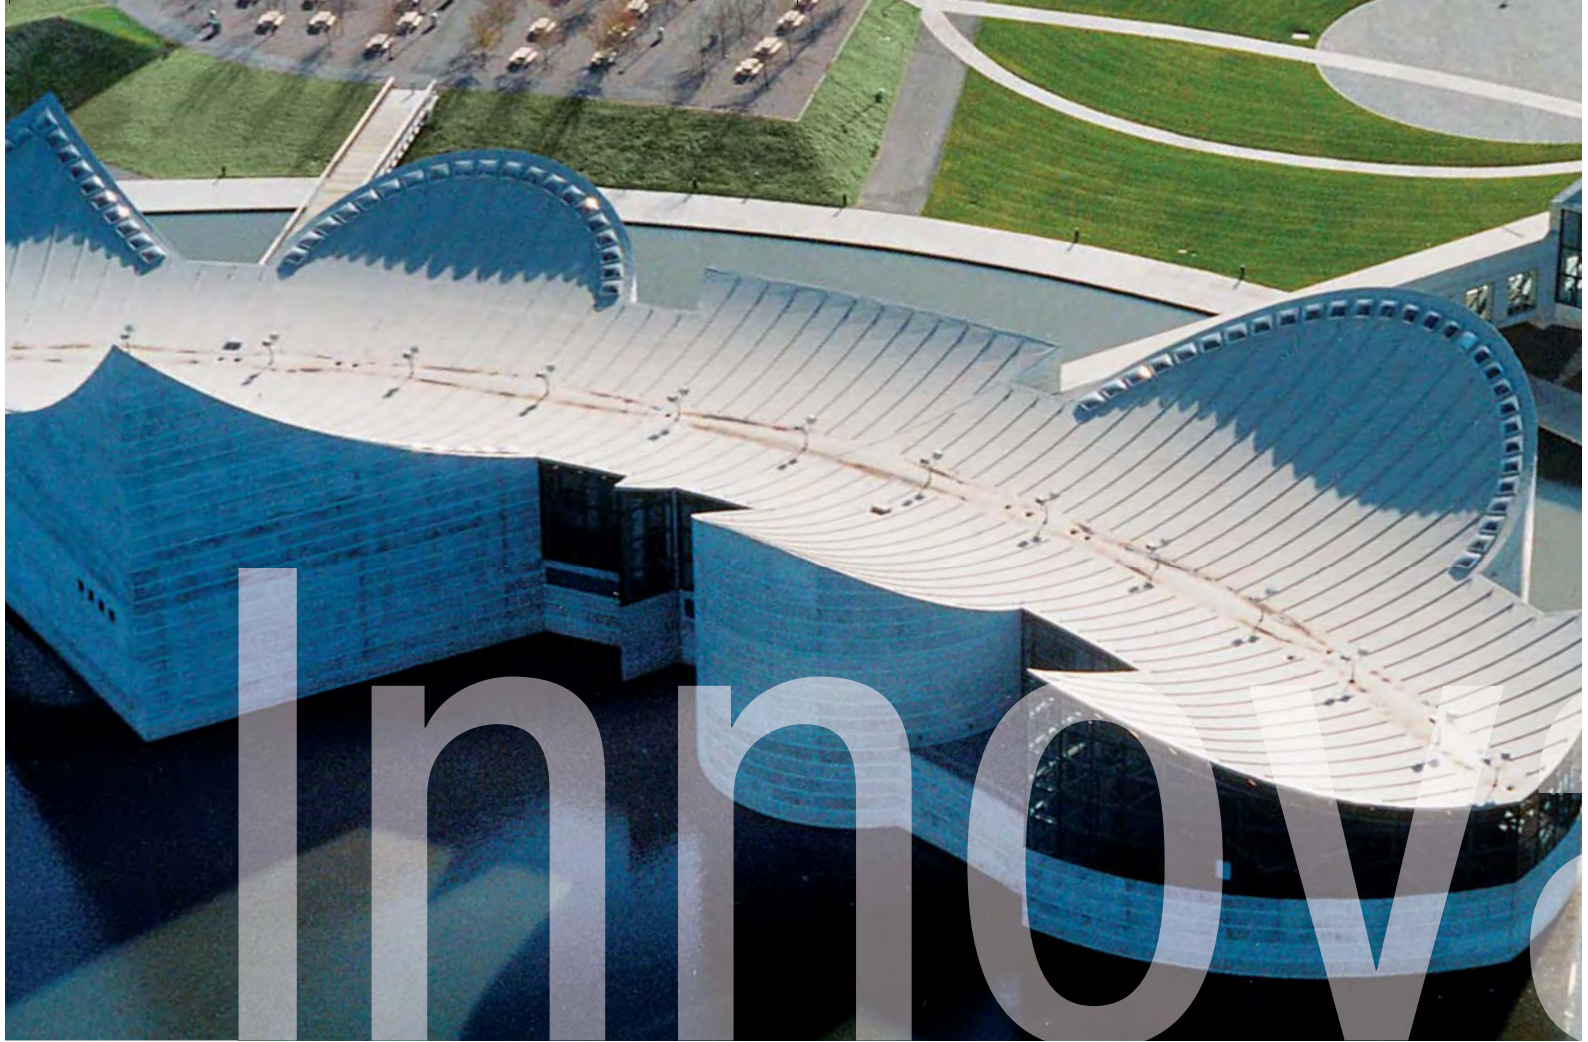

Our highly qualified local teams work with contractors to find efficient solutions and rapidly realize them.

The Sika offer is supplemented by selected services such as:

- Project support
- Standard specifications
- CAD details
- Wind load calculations

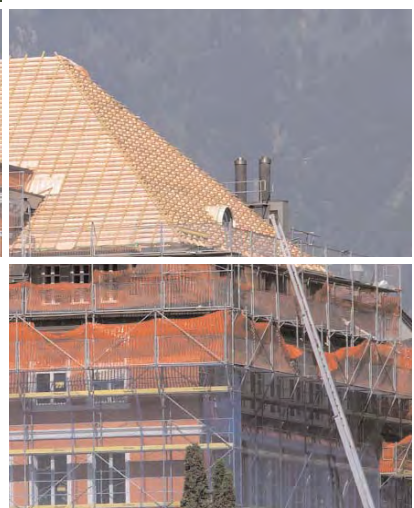

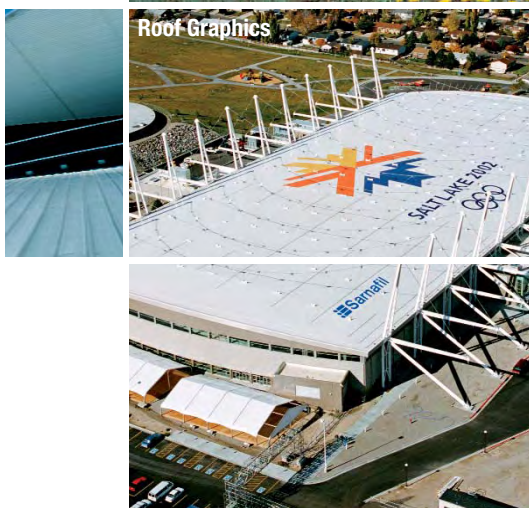

Vision becomes Reality

We have been developing and producing high-quality polymeric waterproofing membranes and system solutions for new construction and renovation projects since 1962.

Innovative concepts, highly modern systems, and durable products are the focus of our processes. The result: our practical and market-oriented solutions satisfy architects, contractors and please owners.
